### 49 CFR Ch. X (10-1-14 Edition)

## Pt. 1139, Subpt. B, Sch. C

should be subdivided into columns (c-1), (c-2), etc. to show separately the revenue for each type of traffic in issue and each column should be appropriately headed. For instance, a proposal to increase passenger fares and express rates would call for Intercity Passenger Revenue in column (c-1), and Express Revenue in column (c-2). If a third basic service is included in the proposed increase, column (c-3) should show revenue from that traffic with an appropriate identification in this column heading.

Column (d). The total issue traffic revenues in this column should equal the sum of columns (c-1), (c-2), etc.

Column (e). The revenues to be reported in this column shall consist of those revenues other than "total issue traffic revenue" (Column (d)), and "miscellaneous station and other operating revenues" (Column (f)). Thus, "non-issue traffic revenue" means those revenues accruing from providing the types of services indicated in columns (c-1). etc., but which may be "intrastate" in nature, are "exempt" as provided under 49 U.S.C. 10721, 10722, 10723 and 10724, or which are otherwise not at issue in a proposed fare and/or charge increase. Such non-issue traffic may also include a commuter or mass transportation service, which is the transportation of passengers generally performed within a city or town and the suburban areas contiguous thereto. However, in some instances this service may also be intercity in

character where the cities involved are within relatively short distances of each other and the primary purpose is the mass transportation of commuter passengers to and from these cities.

Column (f). For the purpose of this schedule the revenues to be reported in this column shall consist of those in Account 3600, Miscellaneous Station Revenue, and in Account 3900, Other Operating Revenue. (See 49 CFR Part 1206.)

Presentation of statement on revenue sample studies. Historically, in order to separate interstate from intrastate revenues, it has not been necessary for annual report purposes for each carrier to conduct studies of its traffic operations, whether based upon sampling or otherwise, however, many of the Class I carriers make such studies for managerial purposes. In order to permit the evaluation of such studies, and the evidence derived therefrom, each study carrier, as defined in section 1139.21, shall submit an affidavit explaining how its study was conducted and how it appraises the reliability of the results. Carriers having studies based upon sampling should conform with the staff report entitled "Guidelines for the Presentation of the Results of Sample Studies,' February 1, 1971.

[42 FR 32541, June 27, 1977. Redesignated and amended at 47 FR 49577, Nov. 1, 1982; 64 FR 53268, Oct. 1, 1999]

### 49 CFR Ch. X (10-1-14 Edition)

### Pt. 1139, Subpt. B, Sch. D

EXPLANATORY—SCHEDULE C (PARTS I, II, AND III)

Columns (d) through (h). These columns shall contain the pro forma year data.

The data reported in column (d) shall be the base year actual (column (c)) restated to reflect conditions (wage, price, and productivity, etc.) prevailing on or near the effective date of the proposed increase. Revenues in column (d) shall be based on fares and charges which are currently in effect.

The data reported in column (e) shall also be the base year actual (column (c)) restated to reflect conditions (wage, price, and productivity, etc.) prevailing on or near the effective date of the proposed increase. Unlike column (d), however, revenues in column (e) shall be based on the proposed fares and charges.

The data reported in column (f) shall also be the base year actual (column (c)) restated to reflect conditions (wage, price, and productivity, etc.) prevailing on or near the effective date of the proposed increase plus al-

lowable foreseeable future costs. Revenues shall be based on the proposed fares and charges.

The data reported in columns (g) and (h) shall be based on what the system revenue needs of the study carriers should be at a given time, including the constructed projected and future operating expenses and the constructed "sum of money" above these expenses. The constructed "sum of money" should be supported by evidence that it is a just and reasonable amount and is that needed to attract debt and equity capital and to insure financial stability and the capacity to render service. Such evidence should include an analysis of the adequacy of the carriers' earnings, the carriers' cost of debt and equity capital, the various kinds of risk attending their operations and the financing thereof, and the carriers' ongoing needs for working capital, new equipment and facili-
